TOBIAS ENDLER
HOW TO BE A SUPERPOWER

The Public Intellectual Debate on the Global Role of the United States after September 11
2012. 303 pp. Pb.
29,90 € (D), 30,80 € (A),
US\$45.95, GBP 26.95

ISBN 978-3-8474-0035-6

How to Be a Superpower focuses on the role and self-perception of public intellectuals in 21st-century America, drawing on a series of interviews conducted with some of the nation's leading thinkers such as Noam Chomsky, Francis Fukuyama, Anne-Marie Slaughter, and Michael Walzer. Through these fascinating interviews, Tobias Endler illustrates how intellectuals inspire, influence, and participate in the nation's public discourse and opinion-shaping process.

The European Union – A Global Actor?

2013. 450 pp. Pb.
48,00 € (D), 49,40 € (A),
US\$69.00, GBP 43.95
ISBN 978-3-8474-0040-0

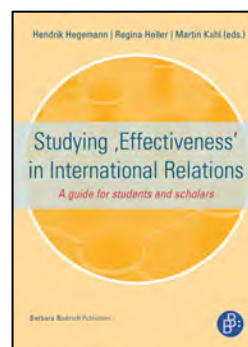

Is the European Union a unified actor in world politics? The world's leading economic power is still struggling to find its role in shaping and maintaining global peace, free trade and commerce. How successful is the EU's Common Foreign and Security Policy and its institutions really? Renowned experts propose answers to these key questions.

The term of governance and the way it has been used by European institutions have elicited much interest in the academic world. However, the notion and its uses have often been studied only in terms of intellectual development or network analysis. Such research leaves us in the dark on a key question. What meaning does this concept actually hold to the actors involved? To what degree do they have a shared definition of the term? Does "European governance" work as a self-fulfilling prophecy, structuring the space of the EU and the practices of its actors?

US\$47.95, GBP 29.95

ISBN 978-3-8474-0027-1

The question of how effective political tools actually are is among the most hotly debated in contemporary IR theory. There is no unanimity how to even measure the effectiveness and impact different political measures produce. This book comprehensively introduces social science students and scholars to the various fields of effectiveness and impact research in the study of international relations.

Politics, Culture and Socialization publishes new and significant work in all areas of political socialization in order to achieve a better scientific understanding of the origins of political behaviors and orientations of individuals and groups. Political socialization theory and research focus on processes by and structures through which individuals become or do not become politically active and acquire or do not acquire general political knowledge, and particular political beliefs, opinions, attitudes, emotions, values and behavioral intentions. The focus of attention is on political socialization processes – including political education, information, persuasion, marketing, or propaganda and their underlying and accompanying motivations – and political socialization structures – including the family, school, mass media, peer groups, social networks, and politics.

Politics, Culture and Socialization publishes new and significant contributions that report on current scientific research, discuss theory and methodology, or review relevant literature. It welcomes the following types of contributions on topics which fall within its aim and scope:

- Empirical research articles.
- Theoretical articles which analyze or comment on established theory or present theoretical innovations.
- Methodological articles
- Book reviews

ILZE RUSE
(Why) Do Neighbours Cooperate?

Institutionalised Coalitions and Bargaining Power in EU Council Negotiations
2013. 196 pp. Pb.

22,00 € (D), 22,70 € (A),
US\$33.00, GBP 19.95

ISBN 978-3-86388-029-3

Negotiations in the European Union Council of Ministers are not only taking place within formal decision-making structures. Member states strive to find allies and coordinate their positions prior to formal negotiation meetings. They either create ad hoc coalitions to pool voting power or cooperate within more durable, institutionalized coalitions that traditionally form due to geographical proximity or among like-minded member states as task-specific coalitions on particular issues. Institutionalised coalitions bestow their members with a bargaining advantage even if they cannot generate enough voting weight to reach voting thresholds.

MARC VON BOEMCKEN
Between Security Markets and Protection Rackets

Formations of Political Order

2013. 323 pp. Pb.

36,00 € (D), 37,10 € (A), US\$52.00, GBP 32.95

ISBN 978-3-86388-030-9

Security is a social practice, which constitutes different formations of political order. Developing a political economy of security practice, the author distinguishes these formations with a view to the actual exchanges between various providers and receivers of security services. He thus departs from a popular perspective in political science, which charts ongoing transformations in the global security landscape along a series of categorical divisions between state and non-state or between the public and the private. A more rewarding analytical perspective conceives the two most dominant security formations in the contemporary world as either based on commercial or on compulsory relations.

Transnational Social Review – A Social Work Journal (TSR) offers an international forum to discuss social work and related disciplines and professions

from a transnational perspective. It responds to the challenges of the increasing impact of transnational developments and structures upon social work and related fields. Due to increasing border crossings by migrants, as well as the political, social and cultural influences of transnational organization and networks nation states and their key institutions are losing their importance, as these social flows transcend national borders and connect formerly different social worlds together. Social work and other support systems are highly influenced by these border crossing developments. However, so far social work is just beginning to systematically reflect and study them.

TSR aims at the transnational opening and development of social work and related fields. Its main objective is to open perspectives for making the concept of transnationalism part of the knowledge structure and practice, in order to extend and transform the legitimization, concepts, research, and methods which to date are primarily nationally-focused.

5 Questions to...

... our author *Sven Bernhard Gareis*

1. What will be the main challenge for your research field in the coming years?

The main challenge in my research field of International Politics will be to identify strategies and approaches toward a just, stable and sustainable world order against a background of more nations and economies competing for shrinking resources.

2. Why would anyone necessarily be active in your research area?

Being active in International Politics research means being in close touch with the overall trends and developments that more strongly than ever affect all policy fields as well as all facets of everyday life.

3. Why did you chose your research field?/ What motivates you in your research topic in particular?

As an analyst with a strong orientation toward empiricism, I find it terrifically inspiring to interact with colleagues from many parts of the world in finding cross-cultural responses to global challenges.

4. Which book has influenced you personally?

Still: Inis L. Claude, Swords into Plowshares. The Problems and Progress of International Organisation.

5. I am author with Barbara Budrich because...

...this a dynamic publisher that brings my writings to the attention of an ever increasing professional audience and that at the same time does its utmost to maintain an encouraging, trustful and personal relationship with me as an author.

Most recent book published with Barbara Budrich:

The European Union: A Global Actor (co-edited with Gunther Hauser and Franz Kernic): Together with a group of hand-picked experts in EU international policies we analyzed Europe's role as an actor on the stage of world politics. Our overarching findings: Europe has achieved a lot on its way to becoming a more global actor – but to maintain the position of a policy-shaping power alongside with the US, China or India, Europe will have to make persistent efforts toward stronger coherence and consistent pursuit of its economic and political interests.

Theoretical Perspectives on Corruption

2010. 205 pp. Pb 24,90 € (D), 25,60 € (A), US\$36.95, GBP 21.95
ISBN 978-3-86649-263-9

The Good Cause focuses on a range of social scientific approaches to the study of corruption, written by academics prominent in these forms of investigation.

Public Administration 2/2012

The whole world of corruption has been transformed over the past few decades. It is far more complex and complicated to fathom than ever before. An understanding of the causes of modern corruption has to reflect these developments.

The book identifies eight major approaches to these questions.

Public Integrity Fall 2011

The Good Cause [...] is then a much welcome attempt to bring together a variety of theoretical perspectives to investigate the competing definitions of corruption and develop theoretical frameworks with which to inform future research. The theory of corruption is likened to a maze and the book takes the reader, via various theoretical routes, through the entrances and exits, as well as the inevitable blind alleys and dead ends, to the study of corruption.
